ADMINISTRATION AND FACULTY

The evolution of man, and his curiosity as to the nature of things about and in him, has created and preserved a vast storehouse of knowledge within this span of time. This knowledge is universally available; however, most of us require someone to clarify, interpret and teach to us that portion of this great legacy which captures our interest and fires our imagination. Indiana Tech is fortunate in having conscientious instructors who realize that learning is a continuous process that will continue throughout time and must be passed on for the benefit and progress of man.

The Aeronautical Engineering Department at Indiana Technical College strives to have the student well prepared in the basic sciences before the advanced aeronautical topics are undertaken. A graduate with a B.S. degree in Aeronautical Engineering may enter many phases of the aeronautical field. The ever increasing advances in the field of aeronautics, such as the earth satellite program, will continue to offer a challenge to the engineer of the present and future.

CHEMICAL ENGINEERING

One of the newest branches of engineering, Chemical Engineering, has advanced rapidly. Practically all industry in some stage of processing, development, or manufacturing, must depend upon men with a knowledge of chemistry. Today there are highly specialized and diversified fields such as Gas, Metallurgical, Ceramics, and Petroleum. Because of its being the basic technology underlying the development and operation of virtually all industry, Chemical Engineering will realize even greater growth in the years to come.

Left to right—Joseph W. Cranmer, Assistant Professor and John Cochran, Assistant Professor.

Left to right—Howard B. Dillon, Instructor; William D. Shrader, Instructor.

The development in the various branches of engineering has created new problems in the design and construction of buildings, highways, airports, and other structures. The Civil Engineer is meeting the demands of our present age with new methods and ideas. Even though Civil Engineering is the oldest of the fields of engineering, it continues to grow and develop and provide opportunities for men of vision.

PROFESSOR ROBERT C. RUHL
Head, Civil Engineering Department

CIVIL ENGINEERING

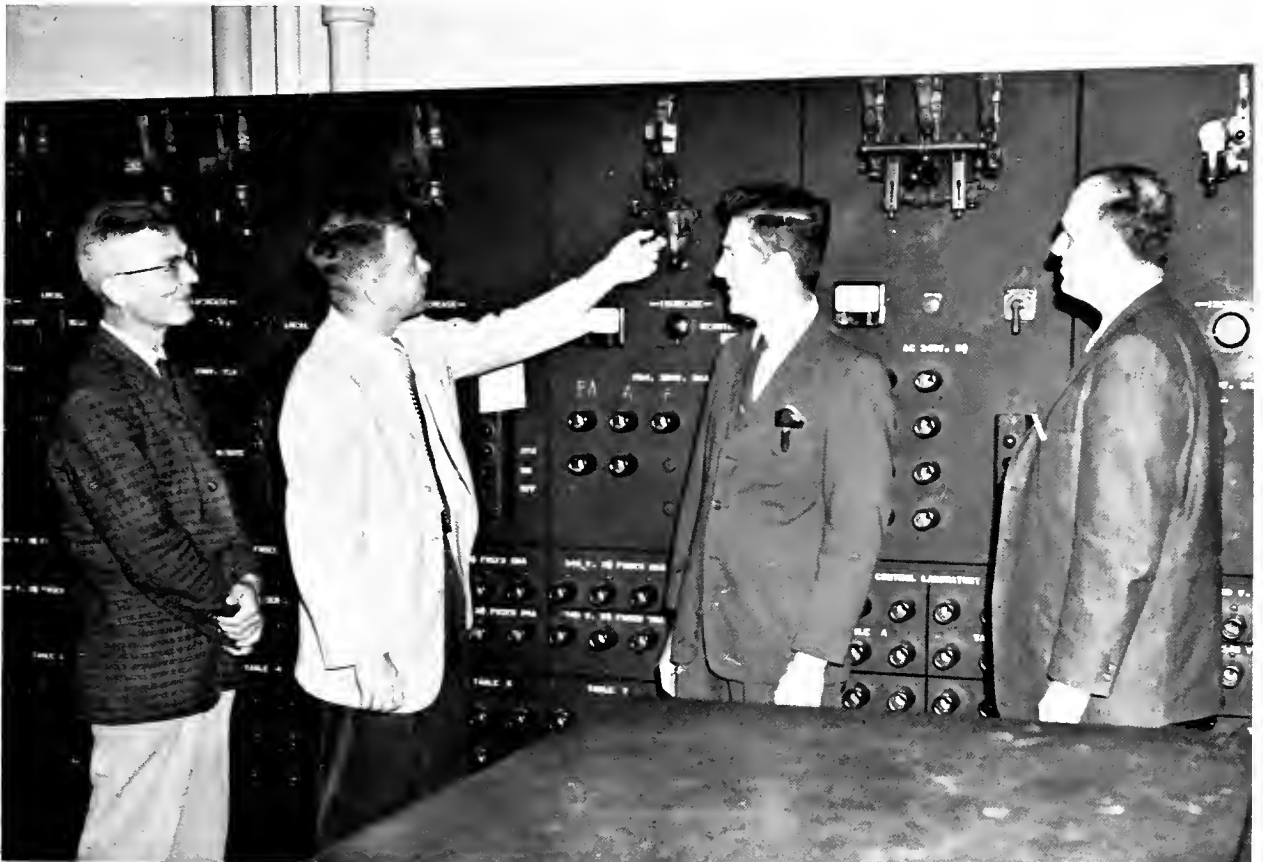

ELECTRICAL ENGINEERING

PROFESSOR WALTER J. WILLIAMS, JR.
Head, Electrical Engineering Department

The increasing utilization of electrical power in this country makes immense demands on the Professional Electrical Engineer. He must know how to select, design, work out economics and production. He is the mastermind in the field of controls, as evidence by today's automation. The skill and creative ability of the Electrical Engineer transforms theoretical knowledge into practical service to meet the challenges of the future.

Left to right—Ralph W. Clark, Instructor; Earl Devlin, Instructor; Morris A. Simmons, Assistant Professor; John Whitney, Assistant Professor.

Left to right—Arthur Price, Assistant Professor, Norbert Torzyn, Assistant Professor and Peter Sorensen, Instructor.

Electronic Engineering is a highly specialized branch of Electrical Engineering. The importance of electronics is recognized as a field of engineering in its own right. To the Electronic Engineer is attributed outstanding development in such realms as guided missiles, radar, color television, electronic computer, radio communication, and atomic energy. The Electronic Engineering curriculum is planned to specialize a fundamental knowledge of electrical engineering to scientific application in the field of electronics.

RAY J. KING
Department Head

ELECTRONIC ENGINEERING

DR. IVAN A. PLANCK
Head, Mechanical Department

MECHANICAL ENGINEERING

The field of Mechanical Engineering is so broad that no man can be an authority on all of its branches. Consequently, Mechanical Engineers tend to become specialists in chosen branches. Therefore, the student is given a thorough background in the basic sciences. This field is very extensive, for practically every manufactured article requires the services of mechanical engineers both in the design of the machine on which it is made and in the production of the article on those machines in the factory.

Left to right—Simon Kuo, Instructor; Robert Marshall, Assistant Professor; Edmund T. Napier, Instructor; C. Jack Quinn, Assistant Professor; Howard A. Macklin, Associate Professor, Dr. Ivan A. Planck, Professor and Head of Mechanical Engineering Department, Robert A. Gruesbeck, Instructor; Dr. Erwin Horiak, Professor.

Dwight M. Case, Instructor (the one with the bow tie).

Engineering Graphics is a descriptive graphical language used by engineers and designers throughout the world to express, develop, and record their ideas and information. Men of industry have indicated that Engineering Graphics is not only important, but absolutely necessary. Students need a thorough grounding in the fundamentals of science and communication, and should be trained early in the engineering approach for the solution of problems. They must have training in space visualization; they must develop their powers of analysis and synthesis; they must be given experience in creative thinking at the start of their college work; and their abilities to develop and record ideas must be constantly challenged.

LEE F. BERNHARDT
Head Engineering Graphics

CHEMISTRY

Chemistry is one of the fundamental sciences, important both in that it underlies all phases of modern living and in its own right as a field of employment for the several hundred thousand American chemists. Its scope includes everything from process control and analysis to the "glamor" fields of nuclear science and radioactive tracer technique, biochemical research, and organic syntheses of vital drugs, plastics and explosives.

Left to right—Dr. Laszlo Szegedy; Dr. Warren Hoffman; Bernard Richardville; Edward Guindon, Assistant Professor; Robert J. Swindell, Assistant Professor (center).

Left to right—Helen Dinius, Lecturer, Margaret Huft, Assistant Professor, Alvin C. Steinback, Instructor, Darlow C. Fox, Assistant Professor.

The primary objective of the English Department in an engineering college is to teach the engineering student the best methods of both oral and written communication. This is essential in order that the engineer may more effectively express himself socially and technically.

MATHEMATICS

In our complex society, scientific progress depends on the mathematician, the engineer, and many other scientists whose primary tool is mathematics. The Department of Mathematics offers a well rounded course for the young mathematicians, as well as the essential mathematics for the engineering, physics, and chemistry students.

Left to right—Hugh D. Landis, Instructor; Hugh G. Harp, Associate Professor; Robert Leeper, Instructor; Fred H. Croninger, Lecturer; Richard E. Sarber, Assistant Professor; James Jacobs, Instructor; Dr. Ralph W. Young, Professor; Gordon L. Cole, Assistant Professor; James R. Dohner, Instructor; Walter W. Bartlett, Assistant Professor.

Left to right—Dean Garrison, Assistant Professor; Ralph W. Brock, Assistant Professor; Dr. Kozoburo Miyakawa, Professor.

If, as has been said, "this is the atomic age," then this is the age of physics. Nuclear weapons and machines are products of the physics laboratory. Each new day finds the physicists of our nation ever widening horizons of man's knowledge. Therefore, Indiana Technical College meets the need for training in physics by offering basic and advanced courses designed to prepare a student either for direct participation in industry, or for a scientific career of the more traditional type.

The Interfraternity Council is a cooperative organization composed of seven fraternities at Tech. They are: Alpha Gamma Upsilon, Kappa Sigma Kappa, Kappa Sigma Phi, Kappa Alpha Psi, Sigma Phi Delta, Phi Kappa Lambda and Theta Mu Pi. The I.F.C. is dedicated towards the coordination of fraternal activities as concerns the school and community.

The Interfraternity Council is also the Judicial body which governs the standardization of the pledging program and minimum requirements for qualification to pledge a member fraternity, and promotes good interfraternity relationships.

KEKIONGAN

Here at college we have learned much of the art of working together on a big project. Memories may fade, but our accomplishment will endure. We, the staff of the 1961 **KEKIONGAN**, humbly submit this book. It is in part a record of the hours we spent in learning all about our campus, in part an endeavor to be of service to our college. But especially it is an attempt, through words and photos, to present an attractive and authentic picture of the school year and its activities.

TECHNICIAN

We of the staff like to feel that we have done a good job in representing the students here at Tech. It has been the object of the paper to arouse student interest where interest was lacking, to promote the school spirit and to bring the student closer to the problem he will face in his profession upon graduation. Above all other things, the interests of Indiana Techincal College both locally, nationally and worldwide were kept uppermost in mind because we believe in Tech and have faith in the principles upon which it was founded. Criticisms, where criticism was warranted, was intended to make Tech a better college—one which we can be proud of.

The purpose of the Iranian Student Club is to unite all students of Iranian descent who are studying at Indiana Technical College and to promote closer contact and cooperation among this group and other student organizations of the College. Membership is open to any student of Iranian descent at Indiana Tech.

IRANIAN STUDENTS CLUB

The Association of Civil Engineers of Indiana Technical College is an organization of students and faculty from the Civil Engineering Department.

The club has one field trip each term, a mid-term party, a banquet in honor of all the seniors of the club, and an award given to the outstanding graduating senior each term.

The purpose of the Chemical Engineering Society is to disseminate information pertaining to the theory and practice of chemical engineering, its applied fields, and to further professional development of the students. Membership is open to any student in chemical engineering.

CHEMICAL ENGINEERING SOCIETY

ELECTRICAL ASSOCIATION

The Indiana Tech Electrical Association is an affiliate of the American Institute of Electrical Engineers. Membership is open to any student enrolled in the electrical or electronic departments.

The purpose of the association is to promote new interests in electrical engineering and prepare the student for his profession by sponsoring field trips and informal discussions with professional men from industry.

AERONAUTICAL SCIENCES

The Institute of Aeronautical Sciences is the representative society for engineers, designers, and technical specialists in all the sciences related to the design and development of airborne craft. Students membership provides the student engineer or scientist with broad opportunities to engage in activities associated with their future careers in aviation.

MECHANICAL ENGINEERING

Members of the Mechanical Engineering Club are local affiliates of the Fort Wayne Branch of the American Society of Mechanical Engineers, ASME.

The objectives of the club are to advance, promote, and teach new phases of mechanical engineering. Programs include talks by experienced engineers, and field trips to industries in the Tri-State area.

The purpose of the Society of American Military Engineers is to advance the knowledge and understanding of the science of military engineering in connection with its service to the United States of America. All full time students are eligible for admission as student members of this national organization.

SOCIETY OF AMERICAN MILITARY ENGINEERS

KEKIONGA AMATEUR RADIO CLUB

The purpose of the Kekionga Amateur Radio Club of Indiana Technical College is to promote amateur radio activities through instruction and active participation among interested students of the College. The available facilities and equipment of the club also help to bring together students who have an interest in the practical application in communications. To qualify for membership a person must be a student or faculty member of the college and must have a Federal Communications Commission License ranging from novice to advanced. Instruction for these licenses is provided by the qualified members to those who wish to take the examination for them.

I. T. C. FLYING CLUB

The I.T.C. Flying Club, largest and most active student body group, is composed of sixty members. The Club owns two planes, a Cessna 140, and a Cessna 120; both are hangared at Smith Field. Day and night, local and cross-country flights are made at the very slight expense to the members. The Club was formed to make flying possible for the students who own license, and qualified instruction possible for the students who wish to obtain a license at reasonable cost. The Club operation is solely supported by members' dues.

PHYSICS CLUB

The Physics Club has set as its goal the advancement and diffusion of knowledge of the science of physics and its application to human welfare. Notable lecturers in the field of Physics are presented from time to time. The club's laboratory provides facilities for experimental projects.

The functions of the Arab Student Club are the dissemination of true and adequate information about the Arab people, the promotion of better understanding and stronger ties with the American people, and the extension of help and guidance to Arab students at Indiana Technical College.

Membership is open to all Arab students and all other students with an interest in the arab world.

Kappa Sigma Phi is a social fraternity of college men dedicated to the promotion of Fellowship, Scholarship, and Sportsmanship. The purpose of this fraternity is to bring together, in close bonds, the brothers of this fraternity; to assist one another while in school as well as in the business world. Kappa Sigma Phi fraternity has a standing membership of approximately forty active members each term. As the turnover in membership is usually large because of the number of members graduating each term, several pledges are accepted for initiation into the fraternity each term.

Kappa Alpha Psi, a college fraternity now comprised of more than 200 undergraduate and alumni chapters on major campuses and in cities throughout the country, boasts a membership of over 20,000. It was founded in the school year of 1910-1911 on the campus of Indiana University at Bloomington, Indiana. Its constitution is the law of an organization predicated upon, and dedicated to the principles of achievement through a democratic fraternity.

Preparation of the coat-of-arms was completed during the summer of 1911 by three of the founders who solicited the aid of a professor of Greek Art at the Indiana University together with that of a professor of Greek at Concordia University.

The second chapter of Kappa Alpha Psi was chartered in 1913.

Iota Tau Kappa is an honorary engineering fraternity whose name symbolizes Industry (Iota), Thrift (Tau), and Knowledge (Kappa). The chief objective of this organization is to promote and to inculcate high ideas and attitudes of scholarship among the members of the student body of Indiana Technical College.

In order to become a member of Iota Tau Kappa, an engineering student must have a grade-point average of 3.5 or more for four terms, not necessarily consecutive terms. At least sixteen college credit hours shall comprise each of these four terms.

BASKETBALL

The first year at Indiana Tech for coach Bob Macy will prove to be one of his hardest years at the helm of the basketball squad. Graduation took its toll of last year's very successful squad so "graying" Bob had to rebuild a new nucleus with inexperienced freshmen and sophomores.

Although the 14 and 12 won and lost record wasn't truly indicative of the type of ball the squad could play, each man on the team worked with Bob as a unit. We are all looking forward to the great season that is expected of this squad next year.

Tech, playing in the Mid-Central Conference, had Huntington tie them for first place. Honors were bestowed upon two Tech warriors by the Mid-Central Conference League. Skip Cloys and Dave Carroll were selected for the first and second conference teams, respectively.

Soccer, perhaps the fastest growing sport at Tech demands a great amount of team work and skill. Coach Robert Leffers' expert guidance has developed the teamwork, brought the skill, and has successfully molded Tech into a strong contender in intercollegiate soccer. The past season saw Tech compile an eight won, one loss, and one tie record against outstanding competition which included the University of Chicago and Michigan State University. The future season will see Tech go into even stiffer competition as they take on the University of St. Louis, the current NCAA champions.

BASEBALL

With hopes of rebuilding the team for the future, the Warriors, aided by the coaching talents of Coach Phil Kennell embarked on a thirteen game schedule and compiled a seven won and six lost record. Jack Barker, short stop, topped the team in hitting and pitcher Hank Nowak paced the squad with a four won, no loss record.

TRACK

The never say die spirit of Tech's Track Team, coached by Bob Macy, was not quite enough to compensate for the apparent lack of team strength. Although, to proceed winless in all scheduled meets, the opponents could hear dying breaths close at their heels.
